AGA KHAN UNIVERSITY EXAMINATION BOARD

Pacing Guide for Teachers

CHEMISTRY

Grade X

Theory

Number of weeks: 28

Number of periods per week: 5

Key Textbook: Chemistry for Grade 10, National Book Foundation, Islamabad (Based on National Curriculum of Pakistan 2022-2023)

Teacher Developer(s) and their Institution(s):

Mrs. Mairaj Kamran – The Mama Parsi Girls' Secondary School & Aga Khan Higher Secondary School, Karachi

Saba Gul – Bai Virbaiji Soparivala Parsi High School

Sehrish Farrukh – BAMM PECHS Government College for Women, Karachi

Dr Saira Erum – Aga Khan Higher Secondary School, Karimabad, Karachi

Aamir Arshad – Meritorious College, Karachi

Syeda Khadija Hasan – Habib Public High School, Karachi

FOR ACADEMIC YEAR 2026 AND ONWARDS

Topic	Total Periods
9. Chemical Equilibrium	13

Sub-Topic	Range of SLOs	Periods (40 mins)
9.1 Reversible Reactions and Dynamic Equilibrium	9.1.1 – 9.1.3	1
	9.1.4	1
9.2 Thermal Reactions	9.2.1 – 9.2.5	2
9.3 Law of Mass Action and Le Chatelier's Principle	9.3.1 – 9.3.2	2
	9.3.3	2
	9.3.4	2
	9.3.5 – 9.3.6	3

FOR ACADEMIC YEAR 2020 AND ONWARDS

Learning Resources

- *Chemistry 10,* Caravan Book House, Lahore.
- Rose Marie Gallagher and Paul Ingram, *Complete Chemistry*, Oxford University Press.
- *Chemistry for Class 11*. Punjab Textbook Board, Lahore.
- Tan Yin Toon, Chen Ling Kwong, John Sadler and Emily Clare, *Chemistry Matters G.C.E. 'O' level*, Marshall Cavendish Education.
- Christopher N. Prescott, *Chemistry, A Course for 'O' Level*, Marshall Cavendish Education.

Suggested Activities and/ or Formative Assessment

Activity 1:

Devise an experiment to investigate the effect of changing various factors on the equilibrium position of a chemical reaction using Le Chatelier's principle.

Activity 2:

Provide a word bank of examples to students and ask them to categories these examples in exothermic and endothermic reactions.

Activity 3:

Link for Le Chatelier's Principle Activity

https://chem.libretexts.org/Ancillary_Materials/Laboratory_Experiments/Wet_Lab_Experiments/General_Chemistry_Labs/Online_Chemistry_Lab_Manual/Chem_10_Experiments/12%3A_Equilibrium_and_Le_Chatelier's_Principle_(Experiment)

Activity 4:

Link for Endothermic and Exothermic Reactions Activity

FOR ACADEMIC YEAR 2026 AND ONWARDS

Topic	Total Periods
10. Acids, Bases and Salts	22

Sub-Topic	Range of SLOs	Periods (40 mins)
10.1 Concepts of Acids and Bases	10.1.1 – 10.1.5	4
	10.1.6 – 10.1.8	1
10.2 Properties of Acids and Bases	10.2.1 – 10.2.3	3
10.3 Strengths and Applications of Acids and Bases	10.3.1 – 10.3.3	2
10.4 pH and pOH	10.4.1 – 10.4.3	1
	10.4.4	2
10.5 Acid-Base Titration	10.5.1 – 10.5.3	2
	10.5.4	2
10.6 Salts	10.6.1 – 10.6.2	1
	10.6.3 – 10.6.4	2
	10.6.5 – 10.6.7	2

FOR ACADEMIC YEAR 2020 AND ONWARDS

Learning Resources

- *Chemistry 10*, Caravan Book House, Lahore.

FOR ACADEMIC YEAR 2026 AND ONWARDS

Topic	Total Periods
11. Organic Chemistry	23

Sub-Topic	Range of SLOs	Periods (40 mins)
11.1 Organic Compounds	11.1.1 – 11.1.2	2
	11.1.3 – 11.1.4	2
11.2 Classification of Organic Compounds	11.2.1 – 11.2.2	2
	11.2.3 – 11.2.5	4
	11.2.6 – 11.2.7	4
11.3 Alkyl Group	11.3.1	1
11.4 Isomerism	11.4.1 – 11.4.3	4
11.5 Nomenclature	11.5.1 – 11.5.2	4

FOR ACADEMIC YEAR 2026 AND ONWARDS

Learning Resources

- *Chemistry 10*, Caravan Book House, Lahore.
- *Chemistry for Class XII*, Sindh Textbook Board, Jamshoro.

Suggested Activities and/ or Formative Assessment

Activity 1:

"Modelling Hydrocarbons with Molecular Kits."

Follow the step-by-step guide:

Materials needed:

- Molecular modelling kit (available in educational or science supply stores)
- Instruction booklet or reference materials (if included with the kit)

Instructions:

Familiarise yourself with the molecular modelling kit components and their functions. The kit typically includes plastic atoms representing carbon (C) and hydrogen (H), and connectors representing chemical bonds. (Magnetic kit can be used)

Explain the basic concepts of hydrocarbons to the participants, including the definition of hydrocarbons as organic compounds composed solely of carbon and hydrogen atoms.

Divide the participants into small groups and distribute the molecular modelling kits to each group.

Instruct the participants to use the atoms and connectors in the kit to build various hydrocarbon molecules.

Start with simple hydrocarbons such as methane (CH_4), ethane (C_2H_6), and propane (C_3H_8).

Encourage the participants to explore different arrangements of atoms and bond angles to create different hydrocarbons.

Allow the participants time to experiment and build different hydrocarbon molecules using the modelling kits.

Ask the participants to share and discuss the hydrocarbons they have built, explaining the number of carbon and hydrogen atoms in each molecule.

Facilitate a group discussion to reinforce the key characteristics of hydrocarbons, such as their carbon and hydrogen composition, the role of chemical bonds, and the diversity of hydrocarbon structures.

Optionally, you can provide real-life examples of hydrocarbons, such as methane (natural gas), ethane (used in fuel), or longer-chain hydrocarbons found in petroleum products.

This hands-on activity allows participants to physically build and manipulate hydrocarbon models, promoting a better understanding of their composition and

FOR ACADEMIC YEAR 2026 AND ONWARDS

structure. It encourages exploration and creativity while reinforcing the fundamental concepts of hydrocarbons tangibly.

Activity 2:

Conduct hands-on activities like molecular modelling and organic compound sorting using cards based on functional groups.

Activity 3:

Link for Isomers activity

https://www.chemedx.org/activity/building-models-isomers

Activity 4:

Link for Functional Groups Activity

FOR ACADEMIC YEAR 2026 AND ONWARDS

Topic	Total Periods
12. Hydrocarbons	23

Sub-Topic	Range of SLOs	Periods (40 mins)
12.1 Saturated and Unsaturated Hydrocarbons	12.1.1 – 12.1.2	4
12.2 Uses of Hydrocarbons	12.2.1	1
12.3 Alkanes	12.3.1 – 12.3.2	3
	12.3.3 – 12.3.4	2
12.4 Alkenes	12.4.1 – 12.4.2	1
	12.4.3 – 12.4.4	4
12.5 Alkynes	12.5.1	2
	12.5.2 – 12.5.3	3
12.6 Reactions of Hydrocarbons	12.6.1 – 12.6.3	3

FOR ACADEMIC YEAR 2026 AND ONWARDS

Learning Resources

- *Chemistry 10*, Caravan Book House, Lahore.
- *Chemistry for Class XII*, Sindh Textbook Board, Jamshoro.
- *Chemistry for Class 10*, Punjab Textbook Board, Lahore.
- Dr Rex M. Heyworth and J. G. R. Briggs, *All About Chemistry 'O' Level*, Hodder Education Singapore.

Suggested Activities and/ or Formative Assessment

Links for worksheets

https://www.pw.live/worksheet-class-10/icse-class-10-science-chemistry/chapter-12-organic

https://www.helpteaching.com/search/hydrocarbons

Activity 1:

Introducing nomenclature, the system of naming compounds can be done using a structured approach that combines theory and practical examples. Here's a suggested method:

Start with the basics: Explain the importance of nomenclature in chemistry, which allows scientists to communicate and identify compounds accurately. Emphasise the need for a systematic and standardised approach to naming compounds.

Discuss the two main types of compounds: Introduce participants to inorganic and organic compounds. Explain that inorganic compounds are typically composed of elements other than carbon, while organic compounds contain carbon atoms bonded to hydrogen and possibly other elements.

Focus on inorganic compound nomenclature: Provide an overview of the naming conventions for inorganic compounds, including ionic compounds and covalent compounds. Emphasise the use of oxidation numbers for transition metals in ionic compounds and the use of prefixes to indicate the number of atoms in covalent compounds.

Explain organic compound nomenclature: Introduce the IUPAC (International Union of Pure and Applied Chemistry) system for naming organic compounds. Highlight the importance of the parent chain, functional groups, and substituents in organic compound names.

Break down the components of organic compound names:

Parent chain: Explain how the longest continuous carbon chain serves as the parent chain, and its name is derived from the number of carbon atoms (meth-, eth-, prop-, but-, etc.).

Functional groups: Discuss common functional groups in organic compounds and their naming conventions.

FOR ACADEMIC YEAR 2026 AND ONWARDS

Substituents: Explain how substituents, which are smaller groups attached to the parent chain, are named prefixes and positioned with locants (numbers) to indicate their locations on the parent chain.

Provide practical examples: Use specific examples to illustrate the naming process. Choose representative compounds from different functional groups and complexity levels. Walk participants through the step-by-step process of identifying the parent chain, functional groups, and substituents to arrive at the correct systematic name.

Practice exercises: Engage participants in naming exercises to reinforce learning. Provide a set of organic compounds and ask participants to determine their systematic names, or vice versa.

Offer resources and references: Provide participants with reliable resources, such as nomenclature guidelines, textbooks, or online tools, to help them practice and expand their understanding of nomenclature.

Encourage active participation, ask questions to assess comprehension, and provide ample practice opportunities. Nomenclature can be complex, so it's important to ensure participants understand the underlying principles before moving on to more advanced topics.

FOR ACADEMIC YEAR 2026 AND ONWARDS

Topic	Total Periods
13. Natural and Synthetic Polymers	20

Sub-Topic	Range of SLOs	Periods (40 mins)
13.1 Types of Polymers and Polymerisation	13.1.1 – 13.1.3	3
13.2 Synthetic Polymers	13.2.1 – 13.2.2	2
13.3 Carbohydrates 13.8 Sources and Uses	13.3.1 – 13.3.4 13.8.1 – 13.8.2	3
13.4 Proteins and Enzymes 13.8 Sources and Uses	13.4.1 – 13.4.3	3
	13.4.4 – 13.4.5	1
	13.8.1 – 13.8.2	1
13.5 Lipids 13.8 Sources and Uses	13.5.1 – 13.5.3 13.8.1 – 13.8.2	2
13.6 Nucleic Acids	13.6.1 – 15.6.3	2
13.7 Vitamins	13.7.1 – 13.7.3	2
13.8 Sources and Uses	13.8.3	1

FOR ACADEMIC YEAR 2026 AND ONWARDS

Learning Resources

- *Chemistry 10*, Caravan Book House, Lahore.
- *Chemistry for Grade 12*, National Book Foundation, Islamabad.
- Rose Marie Gallagher and Paul Ingram, *Complete Chemistry*, Oxford University Press.

Suggested Activities and/ or Formative Assessment

Activity 1:

Provide students with tabular sheets including rows for elements, complex forms, simple forms, use in the body, and rich food sources for carbohydrates, lipids, and proteins, and ask them to fill the sheet.

Link for worksheets

https://mcqlearn.com/grade10/chemistry/biochemistry-multiple-choice-questions-answers.php?page=28

Activity 2:

Check the solubility of monosaccharides and disaccharides with hot and cold water.

Activity 3:

To introduce the peptide linkage between amino acids in a polypeptide chain, you can follow these steps:

Define amino acids: Start by explaining that amino acids are the building blocks of proteins. Mention that amino acids consist of an amino group ($-NH_2$), a carboxyl group (-COOH), a hydrogen atom (H), and a variable side chain (-R group).

Discuss polypeptides: Explain that polypeptides are chains of amino acids linked together through peptide bonds. Emphasise that peptide bonds are covalent bonds

FOR ACADEMIC YEAR 2026 AND ONWARDS

formed between the carboxyl group of one amino acid and the amino group of another amino acid, resulting in the release of a water molecule (dehydration synthesis or condensation reaction).

Illustrate the formation of a peptide bond: Use diagrams or models to visually demonstrate how a peptide bond is formed between two amino acids. Show the carboxyl group of one amino acid bonding with the amino group of another amino acid, resulting in the formation of a peptide linkage (-CO-NH-). Highlight that this process is repeated sequentially to form a polypeptide chain.

FOR ACADEMIC YEAR 2026 AND ONWARDS

Topic	Total Periods
14. Environmental Chemistry I: Atmosphere	9

Sub-Topic	Range of SLOs	Periods (40 mins)
14.1 Environmental Spheres	14.1.1 – 14.1.2	1
14.2 Layers of Atmosphere	14.2.1 – 14.2.2	1
	14.2.3	1
14.3 Air Pollutants, Their Effects and Control	14.3.1 – 14.3.2	1
	14.3.3 – 14.3.4	1
14.4 Environmental Issues (Acid Rain, Ozone Depletion and Global Warming), Their Effects and Control	14.4.1 – 14.4.2	1
	14.4.3 – 14.4.4	1
	14.4.5 – 14.4.6	1
	14.4.7 – 14.4.8	1

FOR ACADEMIC YEAR 2020 AND ONWARDS

Learning Resources

- *Chemistry 10*, Caravan Book House, Lahore.
- *Chemistry for Grade 12*, National Book Foundation, Islamabad.

Suggested Activities and/ or Formative Assessment

Activity 1:

Provide students with illustrative worksheets to identify the layers of the atmosphere.

Activity 2:

Assign groups of students with different areas of the school or community to measure air quality. Provide them with air quality monitoring devices or DIY air quality testing kits. Instruct students to collect data on parameters such as particulate matter (PM), carbon dioxide (CO_2), or ozone (O_3). After collecting data, ask them to analyse the results, identify sources of pollution, and discuss ways to improve air quality.

Activity 3:

Create a model environment using plants, soil, and water. Introduce a simulated acid rain solution (a dilute solution of vinegar or sulphuric acid) and observe the changes in the plants and soil over time. Discuss the causes, consequences, and potential solutions for acid rain.

Activity 4:

Provide materials for a hands-on activity where students create a model of the ozone layer using balloons or plastic wrap. Use a UV lamp or sunlight to simulate the sun's rays and show how the ozone layer protects against harmful UV radiation.

Activity 5:

Use a clear plastic container to represent the Earth's atmosphere. Place a heat source (such as a lamp) inside the container and cover it with another clear container or plastic wrap. Observe the temperature inside the container over time and discuss the greenhouse effect, global warming, and climate change.

Activity 6:

FOR ACADEMIC YEAR 2026 AND ONWARDS

Topic	Total Periods
15. Environmental Chemistry II: Water	11

Sub-Topic	Range of SLOs	Periods (40 mins)
15.1 Properties of Water	15.1.1 – 15.1.2	1
	15.1.3 – 15.1.5	2
15.2 Softness and Hardness of Water	15.2.1 – 15.2.3	3
15.3 Water Pollution and Treatment	15.3.1 – 15.3.2	2
	15.3.3 – 15.3.4	2
15.4 Water Borne Diseases	15.4.1	1

FOR ACADEMIC YEAR 2020 AND ONWARDS

Learning Resources

- *Chemistry 10*, Caravan Book House, Lahore.
- *Chemistry for Class 10*, Punjab Textbook Board, Lahore.
- *Chemistry for Class X*, Sindh Textbook Board, Jamshoro.
- Rose Marie Gallagher and Paul Ingram, *Complete Chemistry*, Oxford University Press.

Suggested Activities and/ or Formative Assessment

Activity 1:

Water testing activity can be performed in the classroom where students can use test strips for water hardness and water samples labelled as soft and hard water and make the response sheet to record their observations and findings for analysis.

Activity 2:

Provide students with real or hypothetical case studies related to water pollution and waterborne diseases. Ask them to analyse the situation, identify the sources of pollution, and describe the potential health impacts.

Activity 3:

Assign small groups of students to research and prepare short presentations on specific waterborne diseases or pollution prevention measures. Each group will then present their findings to the rest of the class.

FOR ACADEMIC YEAR 2026 AND ONWARDS

Note: This teacher-led pacing guide has been developed by educators from AKU-EB affiliated schools to support fellow teachers teaching the AKU-EB syllabi by

- ensuring smooth transition of a school's academic year.
- ensuring curricular continuity in schools.
- predicting the time and pace of syllabi implementation.

This document also contains **suggested activities and/ or formative assessments** that may enhance the learning experience. Please note that these activities are meant to serve as suggestions. As educators, you have the flexibility and autonomy to adapt and modify them to best suit the needs of your students and the dynamics of your classroom.

You are advised to use an ad-blocker while accessing the websites and web resources. In case any website is not functional for any reason, you may inform us at examination.board@aku.edu for an alternative or search material via any search engine.
