AGA KHAN UNIVERSITY EXAMINATION BOARD

SECONDARY SCHOOL CERTIFICATE

CLASS IX

MODEL EXAMINATION PAPER 2026 AND ONWARDS

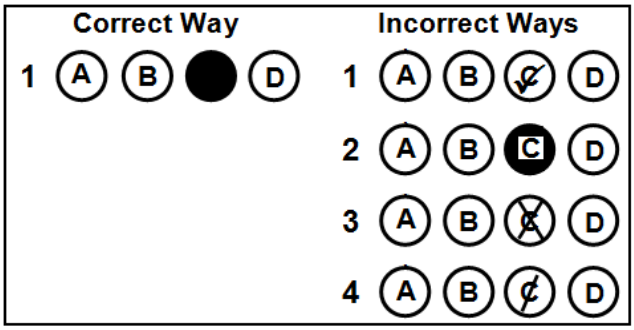

Computer Science Paper I

Time: 1 hour 10 minutes Marks: 40

AKU-EB
Model Paper 2026
For Teaching and Learning Only

INSTRUCTIONS:

1. Check your name and school information on the question paper and Optical Mark Recognition (OMR) sheet. Sign on both if the information is correct.
2. Read each question carefully.
3. Answer all questions on the provided OMR sheet within the allotted time. DO NOT mark your answers on the question paper.
4. There are 100 answer numbers on the OMR sheet. Use answer numbers 1 to 40 only.
5. Each question has four choices: A, B, C, and D. Choose ONE correct answer only. On the OMR sheet, completely fill in the circle corresponding to your choice with a pencil as shown in the example below.

Candidate's Signature

6. If you want to change your answer, ERASE the first answer completely with an eraser, before filling in the new circle. Ensure your marks are dark and clear. Do not make stray marks or leave incomplete fillings as the OMR machine ONLY records what is in the circles.
6. Do not fold, tear, or damage the OMR sheet. Damaged sheets may be scanned incorrectly.
7. You may use a simple calculator if you wish.

1. The purpose of the OSI model in computer networking is to

   A. install antivirus software.
   B. speed up internet connection.
   C. connect the devices using cable physically.
   D. standardise the way of computers communication.

2. In packet switching, data packets move by

   A. staying at one path for speedy transmission.
   B. following the same path to the destination.
   C. taking different paths to reassemble later.
   D. waiting in a queue for other packets.

3. A forest ecosystem is considered as a/ an

   A. human-made system to control climate change.
   B. agricultural process that are managed by machines.
   C. synthetic structure with no fundamental interactions.
   D. natural system where living and non-living things interact.

4. A program running multiple calculations needs faster data access.

   Based on Von Neumann's Architecture, the unit that should be upgraded first is a/ an

   A. input.
   B. output.
   C. control.
   D. memory.

5. If two devices are connected but they are not able to communicate with each other, then the missing component of communication system is the

   A. sender.
   B. receiver.
   C. protocol.
   D. transmission medium.

6. Consider the given properties.

   - Every node is connected with other nodes.
   - It is the most reliable network topology.
   - It is the most expensive topology.

   Based on the given properties, the network topology is identified as

   A. bus topology.
   B. star topology.
   C. ring topology.
   D. mesh topology.

AKU-EB Model Paper 2026 for Teaching and Learning Only

7. Arham, a ninth-grade student, uses social media to share helpful posts. However, he also uses the same platform to bully his classmates.

   Based on this situation, what does this example show about the impact of social media on society?

   A. Social media is dangerous and should be completely banned.
   B. Online efforts to help others are less useful than traditional methods.
   C. The power of social media rests in the way people use it, for better or worse.
   D. The harmful effects of social media are more common than the positive ones.

8. Read the following actions:

   - Find out what the problem asks to do.
   - Carefully read the problem to understand it.
   - What information can be obtained from the problem?
   - Find out requirements for the solution of the problem.

   The step of problem solving process in which these actions are performed is

   A. defining the problem.
   B. analysing the problem.
   C. generating solutions of the problem.
   D. selecting the best solution of the problem.

9. Salar is assigned to solve a problem. He has come up with multiple solutions that produce correct results.

   The step of problem solving in which Salar's action is performed is identified as

   A. defining the problem.
   B. analysing the problem.
   C. finding candid solutions for the problem.
   D. selecting the best solution for the problem.

10. A statement calculates an average of five integers.

    A flowchart symbol that must have the statement is a/ an

    A. input symbol.
    B. output symbol.
    C. process symbol.
    D. decision symbol.

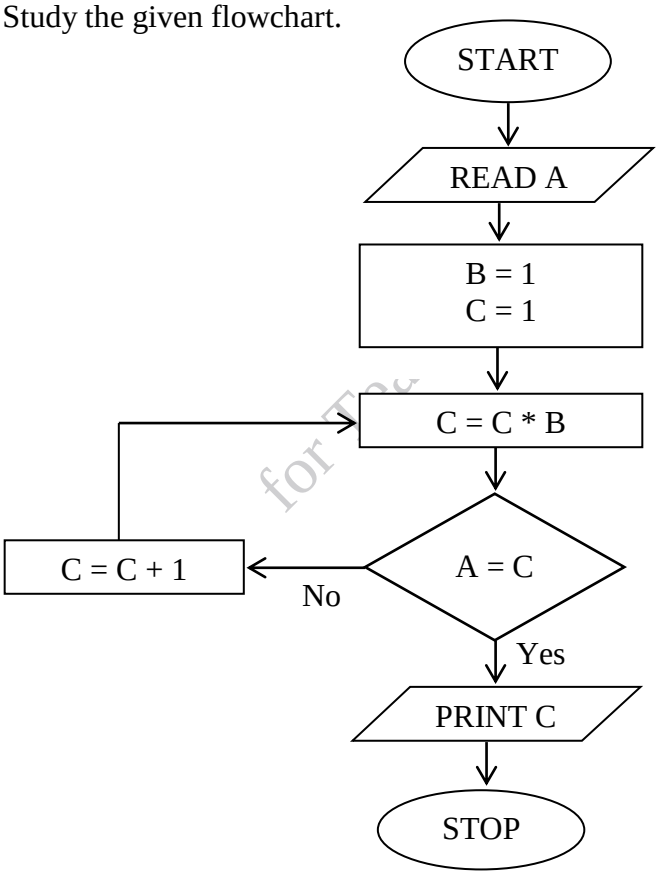

11. Consider the given algorithm.

```
Step 1: Start
Step 2: A = 5
Step 3: B = 4
Step 4: C = A % B
Step 5: X = C + B
Step 6: B = B - 3
Step 7: IF B ≥ 1 THEN GOTO Step 4
Step 8: Output X
Step 9: Stop
```

The output of the given algorithm is

A. 1
B. 4
C. 5
D. 9

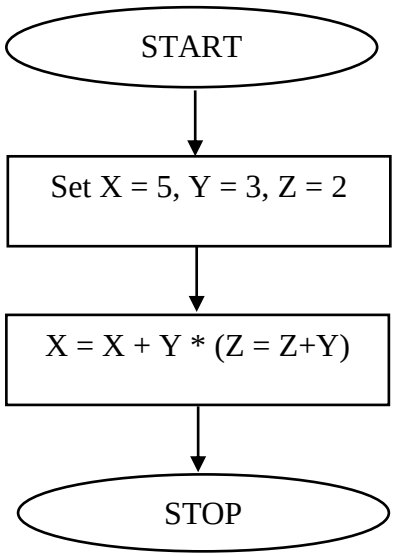

12. Study the given flowchart.

If the input value is 3, then the output value of the flowchart will be

A. 1
B. 2
C. 3
D. 6

13. Consider the given flowchart.

X	Y	Z
?	?	?

The missing values in the trace table are

A. 20, 3, 5
B. 20, 8, 5
C. 40, 3, 5
D. 40, 8, 5

14. Read the given FOUR statements related to HTML.

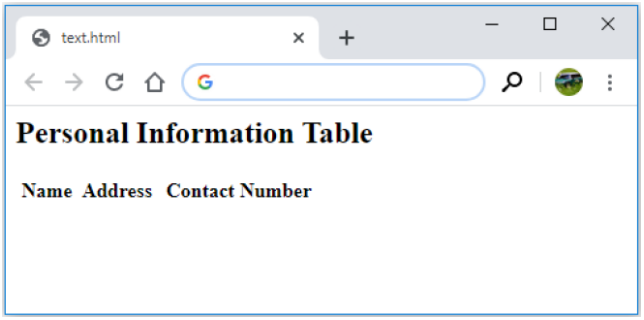

I. HTML tags are case sensitive
II. Each HTML tag is surrounded by < >
III. The first tag in any HTML code is <head>
IV. The last tag in any HTML code is </html>

Which of the TWO statements are INCORRECT?

A. I and II
B. I and III
C. II and IV
D. III and IV

Model Paper 2026

15. Consider the given image of a web page.

The HTML code that should replace the box to complete the given code in order to display this web page is

```
<html>
<body>
<h2>Personal Information Table</h2>
<table style="width:50%">
<table>
</table>
</body>
</html>
```

<th> Name Address Contact Number </th>	<tr> <th>Name</th> <th>Address</th> <th>Contact Number</th> </tr>
A	B
<th> <tr>Name</tr> <tr>Address</tr> <tr>Contact Number</tr> </th>	<tr> <col>Name</col> <col>Address</col> <col>Contact Number</col> </tr>
C	D

AKU-EB Model Paper 2026 Teaching and Learning Only

16. An image with the following specifications is to be inserted in a web page.

- The name of the image is flower.jpg
- The alternative text for image is "Flower Picture"
- The width and height of the image are to be 100 pixels
- A solid black border having thickness of 3 pixels surrounds the picture

The HTML code to insert these specifications in a web page is

A	<img src="flower" alt="Flower Picture" width="100" height="100" style="border:3px solid black">
B	<alt="Flower Picture" img src="flower.jpg" width="100" height="100" style="border:3px solid black">
C	<img src="flower.jpg" alt="Flower Picture" width="100" height="100" style="border:3px solid black">
D	<style="border:3px solid black" img src="flower.jpg" alt="Flower Picture" width="100" height="100">

17. The HTML code to show $X_2 + Y^2$ on a webpage is

A. X² + Y₂
B. X₂ + Y²
C. _X2 + ^Y2
D. ^X2 + _Y2

18. Following line is written in a webpage.

Visit BBC News Urdu for latest news in Urdu.

When someone clicks hyperlink BBC News Urdu, then **https://www.bbc.com/urdu** is opened. The HTML code for this line is

Visit<"BBC News Urdu">a href=https://www.bbc.com/urdufor latest news in Urdu.	Visit <"https://www.bbc.com/urdu"> a href=BBC News Urdu for latest news in Urdu.
A	B
Visit https://www.bbc.com/urdu for latest news in Urdu.	Visit BBC News Urdu for latest news in Urdu.
C	D

AKU-EB Model Paper 2026 Teaching and Learning Only

19. A text with the following specifications is to be displayed on a web page.

- italic style
- green color
- font size of 20px

The HTML code to insert these specifications in a web page through inline CSS is

A	Welcome!
B	Welcome!
C	Welcome!
D	Welcome!

20. The JavaScript code that uses the prompt( ) function to ask for the user's name and store it in a variable is

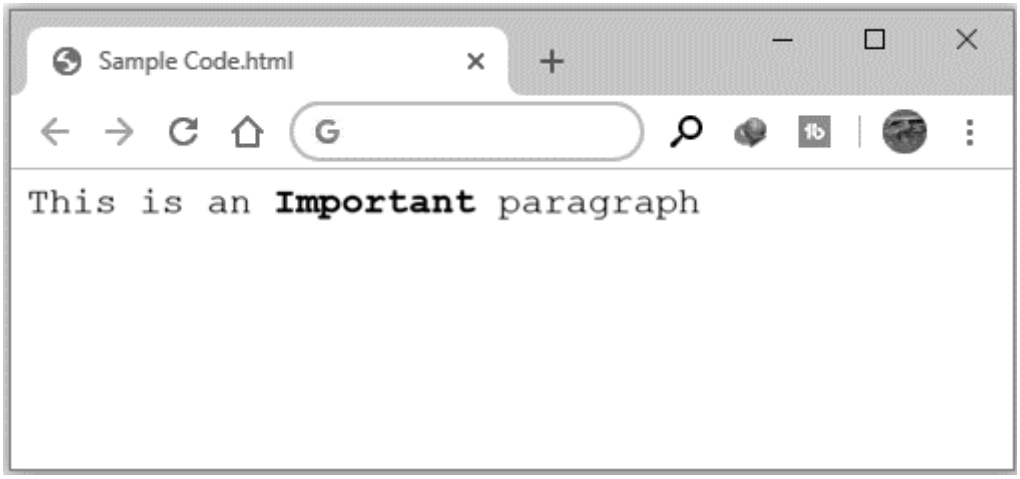

A	var name = prompt("What is your name?");
B	prompt("What is your name?", name);
C	name = prompt("Enter your name:");
D	var name = prompt;

21. Which of the following is a valid variable name in JavaScript?

A. 1stName
B. $salary
C. @city
D. const

AKUEB-2026 Model Paper for Teaching and Learning Only

22. Consider the given image of a web page showing a sentence. The font style of the sentence is **Courier New**.

The HTML code to show this sentence is

A	<p This is an <I>Important</I> paragraph style="font-family:'Courier New' ">
B	This is an <I>Important</I> paragraph.
C	This is an <I>Important<\b><\I> paragraph.<\p>
D	<p style:"font-family='Courier New' ">This is an <I>Important</I> paragraph.

23. In computer science, data science contributes to

A. data storage.
B. data analysis.
C. software deployment.
D. network configuration.

24. The MAIN goal of data analysis is to

A. extract meaningful insights.
B. create user interfaces.
C. export CSV files.
D. sort large files.

25. A public health agency tracks real-time clinical reports, regional infection spikes, population density, and vaccination coverage to deploy emergency health reserves before an outbreak worsens. The response model improves year after year with updated data.

The conclusion that accurately reflects the strategic role of data science in this case is that it

A. forecasts resource shortages to drive policy decisions.
B. monitors daily staff attendance in regional hospitals.
C. automates vaccine procurement documentation.
D. evaluates insurance claim discrepancies.

26. An educational institution tracks students exam scores, attendance rates and feedback on course content and students' experiences. The scores and attendance are numerical, whereas feedback includes open-ended responses about course strengths and weaknesses.

Considering the given situation, data can be classified as

	Quantitative	**Qualitative**
A	exam scores	feedback responses
B	attendance rates	exam scores
C	feedback responses	students experiences
D	students experiences	attendance rates

27. The vast amount of data generated and stored across various systems refers to one of the characteristics of big data that is

A. variety.
B. volume.
C. validity.
D. velocity.

28. Data visualisation contributes to big data interpretation by all of the following ways EXCEPT

A. transforming raw data into interactive formats for decision-making.
B. organising data in a structured format for database integration.
C. relying on statistical analysis to provide direct solutions.
D. storing data in graphical representations for future use.

29. In the government sector, big data is MOSTLY used to

A. track tax data.
B. enhance surveillance systems.
C. support informed policy decisions.
D. monitor individual citizen activities.

30. Modern transportation systems benefit from Artificial Intelligence (AI) by

A. providing fixed schedules without live data.
B. delaying route updates until human approval.
C. suggesting routes based only on past routines.
D. optimising routes through traffic pattern analysis.

31. A warehouse uses intelligent robots equipped with sensors and AI algorithms to navigate paths, avoid collisions and adapt routes during inventory transportation.

The robotics application of AI supports logistics by

A. optimising movement through real-time path correction.
B. repeating fixed routines regardless of surroundings.
C. tracking items solely through barcode timestamps.
D. triggering alarms based on default motion paths.

32. The role of Machine Learning (ML) in modern systems is demonstrated by

A. enabling systems to adapt and improve through experience-based learning.
B. recognizing hidden patterns in large datasets to support decision-making.
C. enhancing predictive accuracy through continuous data analysis.
D. automating complex tasks by learning from previous outcomes.

33. A robot learns to navigate by receiving rewards or penalties using

A. reinforcement learning based on environmental interaction.
B. unsupervised learning driven by hidden data patterns.
C. supervised learning based on static labeled training.
D. machine learning with curated instructions.

34. Cloud platforms support software development by

A. restricting access to pre-installed coding templates.
B. enabling scalable collaboration across remote teams.
C. removing the need for any development tools entirely.
D. executing local programs through static environments.

35. An educational platform integrates voice recognition to help learners with reading disabilities improve pronunciation.

The given scenario illustrates computing used for developing

A. psychomotor skills.
B. language skills.
C. listening skills.
D. visual skills.

ANGLEB Model Paper 2026 for Teaching and Learning Only

36. Brute force attacks take place by

A. trying many password combinations until access is gained.
B. sending malware through flash drives into secure systems.
C. pretending to be a trusted user through deceptive emails.
D. influencing users to download false applications.

37. Two-step verification improves security by

A. encrypting all personal information at once.
B. creating backup files during login procedures.
C. using a single password for more than one platform.
D. applying more than one method other than a password.

38. An essential role of entrepreneurs in the economy involves

A. promoting all existing business models.
B. avoiding financial risks at every opportunity.
C. identifying gaps to offer innovative solutions.
D. delaying product launches to avoid competition.

39. Market trends in entrepreneurship typically refer to the

A. modification of products over time.
B. consumers' preferences for a specific brand.
C. government's regulation to prevent market shifts.
D. traditional practices that do not change over time.

40. A tech startup explores building AI chatbots for e-commerce platforms. They list common chatbot limitations and explore possibilities to replace, combine, adapt and modify functionalities to deliver better performance.

Based on the given scenario, the technique for generating innovative chatbot ideas is

A. SWOT to assess internal financial risks.
B. reverse engineering to reduce bot speed.
C. SCAMPER to evolve chatbot functionalities.
D. trend analysis to copy what's already successful.
